DEFINITIONS AND FORMULA

Recidivist: A felon who returns to prison for any reason during a specified follow-up period.

Return to prison: Includes felons who are returned to Substance-Abuse Treatment-Control Units in correctional facilities; returned pending a revocation hearing by the Board of Prison Terms on charges of violating the conditions of parole; returned to custody for parole violations to serve revocation time; or returned to prison by a court for a new felony conviction.

Release period: A calendar year.

First release to parole: The first release to parole for felon with new admissions and parole violators returned with a new term (PV-WNT).

Recidivism rate: The ratio of the number of recidivists to the number of felons at risk of recidivating during a particular period.

$$\text{Recidivism Rate}_{(\text{observation period})} = \frac{\# \text{ of recidivists}_{(\text{observation period})}}{\# \text{ of felons at risk of recidivating}}$$

For example:

$$\text{Recidivism Rate (during year xxxx)} = \frac{26,092}{60,179} \times 100 = 43.35\%$$
